

7th Commodity Markets Winter Workshop

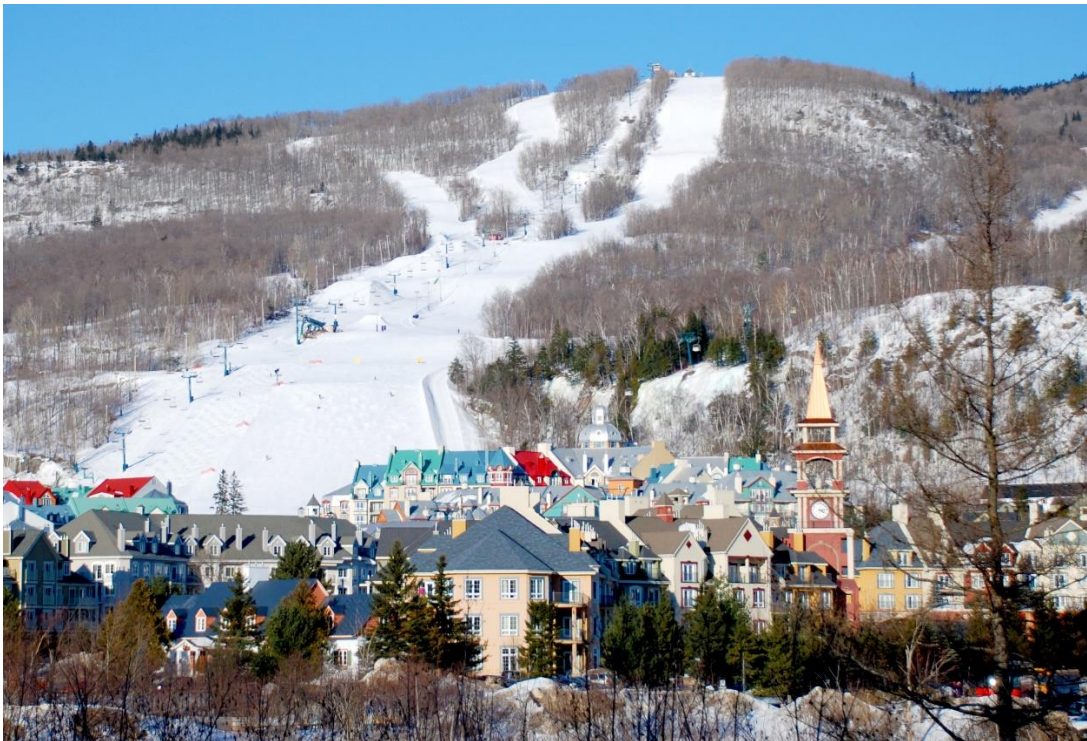

Mont Tremblant, Canada

Wednesday 10 January to Friday 12 January 2024

Mont Tremblant (north of Montreal), Canada

The aim of the workshop is to present and discuss high-quality research in all areas of finance and economics related to commodity markets in a stimulating and relaxed atmosphere.

The 7th Commodity Markets Winter Workshop will take place at Mont Tremblant, Canada, following on successful events in Lillehammer (2017 and 2023), Nantes (2018), Hannover (2019), Quebec City (2020), and St. Johann im Pongau (2022). Mont Tremblant offers excellent skiing facilities for both alpine and cross-country skiing as well as possibilities for many other winter activities. The conference hotel provides a free shuttle to the main slopes and tracks. Organized by Université Laval, FSA Business School, Department of finance, insurance and real estate with the support of the CRREP research centre.

Call for papers

Topics

We welcome submissions from all areas of economics and finance related to commodity markets, including:

- Micro & macroeconomic analysis of commodity markets
- Portfolio allocation/optimization including commodities
- Pricing, hedging, and risk analysis of commodity derivatives and derivatives portfolios
- Commodities business analytics
- Financialization of commodity markets
- The microstructure of commodity markets
- Corporate finance and risk management related to commodity markets
- Econometric/statistical analysis of commodity markets
- Decision models (OR/MS models) applied to the commodity sector
- Real option analysis investigating commodity project investment and production decisions
- Financial market analysis (risk factor models etc.) for commodity markets
- Managerial accounting & economics for commodity related corporations
- Global and regional trade of commodities
- The role of commodity production and consumption for developing countries

Commodity markets in this context include the entire range of commodities, i.e., energy (including electricity and renewables), metals, agricultural products, as well as related markets including shipping and transportation services, emission quotas and weather derivatives.
